

## Culture House

The Mercedes-Benz Museum is the only museum in the world that can document in a single continuous timeline the more than 130 years of auto industry history from its very beginnings to the present day. On nine levels and covering a floor space of 16,500 square metres, the museum presents 160 vehicles and over 1,500 exhibits. As a place of innovation, it also demonstrates that history can point the way ahead

LOCATION	246 Sample Street, ABB Dist, Belgium
CLIENT	Belgium Government
DATE	2021
TYPE	Architecture, Interior
SERVICE	Design, Construction, Consulting

## Concept

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable. If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't anything embarrassing hidden in the middle of text.

### Challenge

One of the most successful designer solutions was the use of unifying concept for the meeting rooms through a common design theme: each of the meeting rooms is named after one of the planets of our solar system and is decorated with the relevant cosmic images.

### Solution

A modern engineering system with a high degree of automation was installed in the building. In order to guarantee the uninterrupted functioning of all systems and maintain a comfortable climate in the office, an additional high-power cooler was installed on the roof of the business center.

“ The secret to the successful implementation of this project is simple. We just brought together the best people and understood that we were facing a task that is unique in its scale and significance. ”
